WORK EXPERIENCE

Persec Co., Ltd.

iOS Developer

May 2025 - Present

- Architecture & Development: Developed and maintained VPN applications utilizing MVVM, Swift, Objective-C, and RxSwift/RxCocoa for efficient API management and data flow.
- VPN Integration: Debugged and refactored codebase to implement VPN integration for products including BullVPN, VPN4Games, and UPPER.
- Protocol Support: Integrated multiple VPN protocols (IKEv2, IPsec, WireGuard) and resolved critical OS-level issues like IKEv2 connectivity on OS 26.
- DevOps & Quality: Implemented Fastlane for CI/CD automation and integrated Analytics/Crashlytics to monitor application quality.
- Feature Expansion: Expanded platform support to tvOS (Apple TV) and implemented personalization features such as Profile switching and App Icon customization.
- StoreKit Migration: Successfully migrated in-app purchase systems from StoreKit 1 to StoreKit 2.

BBTV new media co., ltd.

iOS Developer

April 2024 -March2025

- Application Development: Developed streaming applications for Bugaboo.TV, Champ7HD, and THM using VIPER Architecture for modularity and scalability.
- Server-Driven UI: Delivered dynamic, server-configured interfaces to allow real-time layout updates without app releases.

- Core Features: Implemented Deep Linking for seamless navigation and optimized a custom Search Engine for fast, accurate results.
- Media Playback: Integrated a custom Video Player with adaptive streaming and comprehensive playback controls.
- Payment Systems: Designed multi-currency payment flows using StoreKit 2.
- Apple TV: Implemented "Shelf Content" management and conditional video search functionality for the tvOS version.

Internship (Wellios Company Limited)

Flutter Developer

4 months (2023 - 2024)

- Developed the "GiftPoint" feature for the Wellexp application, including a Bulk Employee Point Transfer System with QR Code and automatic receipt generation.
- Enhanced UI/UX and implemented ADFS Login for the SiPH application.

Internship (TOT Public Company Limited)

Mechanic Assistant

4 months (2021 - 2021)

- Managed server systems for local exchange offices across Phitsanulok.

SKILL

- **iOS/Mobile:** Swift, Objective-C, SwiftUI, UIKit, StoreKit, Fastlane
- **Cross platform:** Dart
- **Frontend**: Html, CSS
- **Languages:** Javascript, Typescript, C/C++/C#
- **Tools/Platform:** Git, Postman, Swagger, AWS Cloud

SOFT SKILLS

- Communication
- Time Management
- Flexibility and Adaptability
- Teamwork and Collaboration
- Analytic and Critical Thinking
- Decision Making
- Curiosity and Lifelong Learning
- Positive Attitude

EDUCATION

Rajamangala University of Technology Lanna TakBachelor's Degree in Computer Engineering | 2021 – 2024

- **Senior Project:** Developed a fitness application using SwiftUI with Apple Watch connectivity.

Phitsanulok Technical CollegeHigh Vocational Certificate in Computer Technology | 2019 – 2021

- **Project:** Created a "Score Board" using Arduino with Firebase integration for real-time temperature display.

COURSES & CERTIFICATES

- Introduction to iOS Mobile Application Development (Coursera)
- Introduction to Swift Programming (Coursera)
- Programming Fundamentals in Swift (Coursera)
- Version Control (Coursera)
